OUR COMMITMENT TO QUALITY AND SUSTAINABILITY

Operating on the national and international market for 40 years, ICA is a paper converting company specialised in Away-from-Home products: from industrial rolls to hand towel rolls, from toilet paper to medical sheet rolls and many more.

We are committed to continuously expanding our range of products in a perspective of constant innovation and focus on improving our quality, reliability and safety standards in order to offer our customers products that are more and more performing, hygienic and sustainable.

Our desire to contribute to a better world by promoting the use of renewable sources and the safeguard of our forests, led us to obtain PEFC and FSC certifications which enabled us to sell paper products whose pulp origin is 100% controlled by international organisations that aim to preserve the natural Environment, respect the natural forest regeneration time, engage local community members, and protect customary rights of indigenous people and forests' workers.

ISO 9001 Quality Management

ISO 9001 identifies specific regulations and guidelines that have been developed by the International Standardization Organization (ISO). These regulations define the requirements for the realization of a quality management system in an organization, in order to lead the business processes and to improve the effectiveness and the efficiency in realizing the products and supplying services, to obtain and increase customer satisfaction.

PEFC Programme for the Endorsment of Forest Certification Schemes

The PEFC mark guarantees the presence of a company within a chain of certified businesses, and the use of sustainable raw materials, that must be produced according to specific environmental, social and economic criteria.

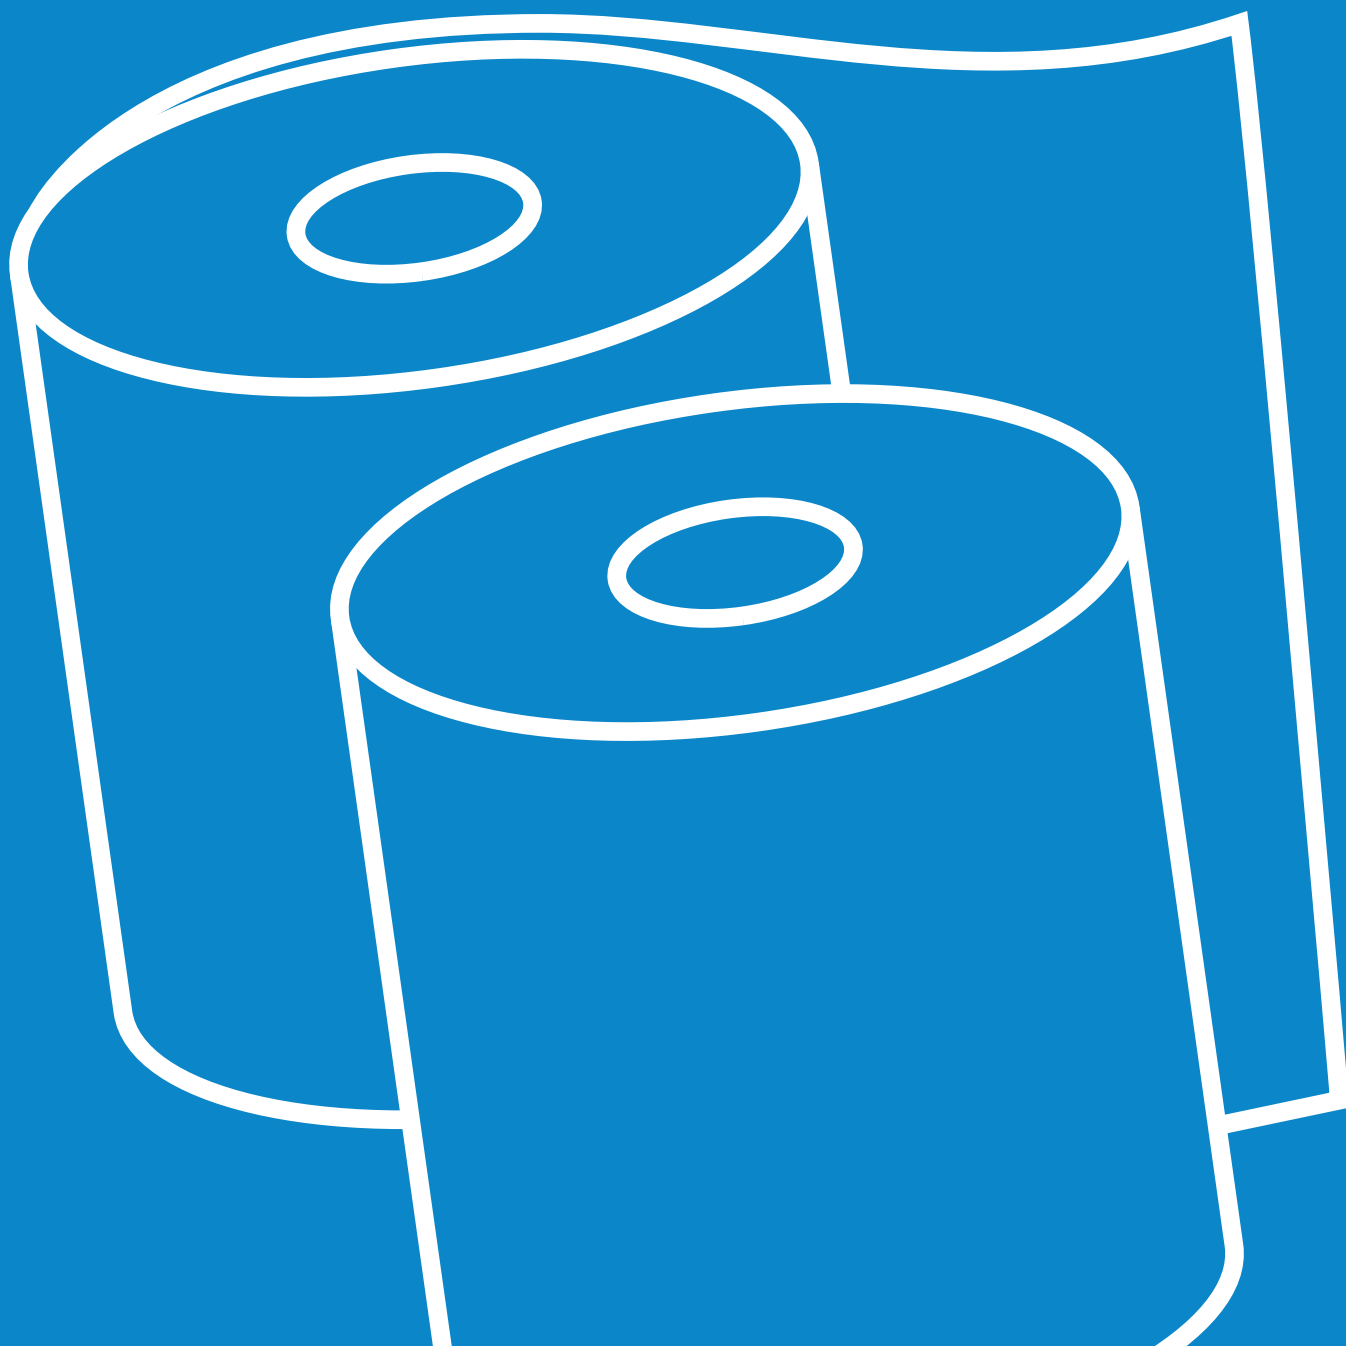

The mark of
responsible forestry
FSC® C145406

FSC® Forest Stewardship Council®

The Forest Stewardship Council® (FSC®) is a global, not-for-profit organization dedicated to the promotion of responsible forest management worldwide. FSC defines standards based on agreed principles for responsible forest stewardship that are supported by environmental, social, and economic stakeholders.
